Professional Growth Plan

1. Personal Growth Needs

- Interacting in a professional method with students, administrators, and peers.
- Willingly to acknowledge weak points in my teaching and put forth effort to gain all knowledge necessary to educate.
- Being non-judgmental as possible
- Always wanting and willing to improve education in any possible way.
- Will go above and beyond main job description to ensure student’s success.

Area of Growth: Technology and maintaining up-to-date with new technological advances.

2. Personal Growth Objectives:

- To obtain more knowledge of topics and subjects that I am inadequately educated in.
- To become more aware of students needs and to understand how each student has a different background and home life.
- To continue to learn different teaching methods in order to create best learning scenario.
- Keep up with technology and increase its usage and importance with students.

3. Specific strategies to achieve the objectives:

- Attend seminars and lectures over teaching all students, focusing on dealing with the great diversity many school systems maintain.
- Attend technology meetings and read articles in order to keep up-to-date.
- Continue to be willingly to learn and revise any mistakes in my teaching curriculum by obtaining suggestions and advise from peers.

4. Assessment procedures to measure if you have achieved our professional development objectives:

- Seeing the students enjoy themselves and respond to education by the showing of their knowledge through tests, quizzes, and everyday communication between I the teacher and the students will show if I have met my objectives.
