Profession Growth Plan

I am able to communicate clearly with students from various economic and cultural backgrounds. I hold high expectations for students and use encouragement and reinforcement appropriately to help them reach their potential. I need to further develop my technology skills.

I plan to work on learning to use “Powerpoint” on my home computer. I have a manual that will help me as well as family and friends. My goal will be to develop a simple presentation to demonstrate my understanding of this program. I will also learn to do the simple connections of the keyboard, mouse and monitor. I will practice until I feel confident of this skill.
